Dear Valued Customer,

- Low Density Polyethylene (PE-LD) products have no shelf-life limitations.
- PVC (Vinyl) products have no shelf life. However, if the product is not stored in a climate controlled environment ( $68^{\circ}\text{F} \pm 4^{\circ}$  and  $60\% \pm 5\%$  humidity), there may be minor leaching after 12 months. This leaching does not affect fit or function, but parts may feel slightly tacky.

If you have any questions, please contact me.

Best regards,

A handwritten signature in black ink that reads "Kimberly J. Gamble".
